Re: Implementation Plans of Wireless E911 Phase II Automatic
Location Identification
Notice Pertaining to CC Docket No. 94-102

Dear Ms. Salas:

In accordance with the Third Report and Order in Docket No. 94-102 and the Commission's related Public Notice, DA 00-2099 (released September 14, 2000), we hereby submit our report of implementation plans for Wireless E911 Phase II Automatic Location Identification, as follows:

Background/Contact Information

- 1) Carrier Identifying Information: Consolidated Telcom
TRS Number: 803200
- 2) Contact Information: Richard D. Rubino, Esq.
Blooston, Mordkofsky, Jackson & Dickens
2120 L Street, N.W., Suite 300
Washington, D.C. 20037
Tel. (202) 659-0830
Fax (202) 828-5568

E911 Phase II Location Technology Information

- 1) Type of Technology: Handset-based solution
SnapTrack, Inc.

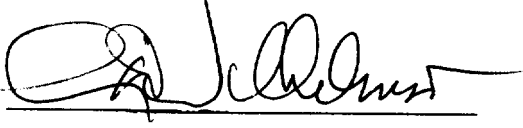

- 2) **Testing and Verification:** Testing will be conducted in accordance with the Empirical Testing Method per OET Bulletin No. 71 and the equipment manufacturer's requirements.
- 3) **Implementation Details and Schedule:** Consolidated proposes to commence initial service during the second quarter of 2001 with E911 Phase I in place. Consolidated has not yet received a PSAP request. We anticipate that E911 Phase II will be available the later of October 1, 2001 or six months of the date we receive a request from the PSAP for Phase II implementation. In order to facilitate the conversion of our subscriber handsets to Phase II compliant handsets at a rate which is more rapid than normal attrition, we will use customer mailings, billing inserts, store promotions and similar efforts to make our existing subscribers and any potential subscribers aware of the availability and benefits of E911 Phase II capability.
- 4) **PSAP Interface:** We have alerted the relevant PSAP of our proposed deployment schedule during the second quarter of 2001. We anticipate that the PSAP will make its request in the near future. Upon receipt of a request, we will work with the PSAP to determine the interface requirements.
- 5) **Existing Handsets:** Not applicable.
- 6) **Location of Non-Compatible Handsets:** Not applicable. Our system has not yet been constructed. However, as indicated above, to the extent that our subscribers have non E911 Phase II compliant handsets at the time E911 Phase II is implemented, we will use mailings, billing stuffers, and in store promotions to bring the benefits of E911 Phase II to our customers' attention in order to facilitate the replacement or conversion of existing handsets to E911 Phase II compliant equipment.
- 7) **Other Information:** No PSAP request for Phase II E911 has been received.

Upon commencement of service to the public and receipt of a request from the PSAP, we stand ready to implement E911 Phase II. We continue to be in contact with the PSAP, and as necessary, will update this report in order to keep the Commission apprised of our progress.

Respectfully submitted,

CONSOLIDATED TELCOM
